

Ideation Phase

Define the Problem Statements

DATE	26 September 2022
TEAM ID	PNT2022TMID10110
PROJECT TITLE	News Tracker Application
MAXIMUM MARK	2 Marks

Problem Statement	It is difficult to store such a large amount of information without overloading traditional computer systems and it is difficult to protect great volumes of digital data when it is being stored
Idea / Solution	<ul style="list-style-type: none"> • File storage. • Big Data Analytics. • Data backups and archiving. • Disaster recovery. • Software testing and development. • Infrastructure as a Service (IaaS) and Platform as a service (PaaS) • Communication.
Novelty / Uniqueness	<ul style="list-style-type: none"> • Data Mining Applications in cloud computing projects • Developing the Eco- Friendly & sustainability based on centre • Online Automation of a university campus/ college • Remote control smart devices
Social Impact	<p>Cloud computing offers a way to coordinate and share organizational and personal information and data. The adoption of cloud services is one of the most emerging technological advances in the current competitive business environment.</p> <p>Cloud-based services allow start-ups or SMBs to take advantage of technological advancements.. A hypothetical model was constructed based on a literature review, and the associations between the latent variables were investigated utilizing structural equations.</p>
